Dear Hiring Manager,

I am excited to apply for this opportunity.

Throughout my career, I have built a strong track record leading IT support and infrastructure teams, ensuring service reliability, operational efficiency, and high levels of customer satisfaction. My experience spans service desk operations, incident and problem management, infrastructure administration, vendor management, KPI monitoring, and continuous service improvement initiatives.

What differentiates my approach is the combination of hands-on technical knowledge and people leadership. I have successfully led teams responsible for supporting business-critical environments, driving operational excellence while fostering a culture of accountability, collaboration, and customer focus. I believe that strong IT organizations are built not only on technology, but also on well-defined processes, clear communication, and engaged teams.

Throughout my professional journey, I have worked closely with stakeholders across multiple business areas, translating operational needs into practical technology solutions that improve service quality and business outcomes. I am comfortable operating in dynamic environments, managing competing priorities, and making data-driven decisions to enhance performance and service delivery.

I am particularly motivated by opportunities where I can contribute to team development, service maturity, operational governance, and the continuous evolution of IT services. My goal is always to create an environment where technology enables business success while delivering an exceptional experience for users and customers.

Thank you for your time and consideration. I would welcome the opportunity to discuss how my experience, leadership style, and commitment to operational excellence can contribute to your organization's success.

Sincerely,

Geovane Gofredo
