PROFESSIONAL SUMMARY

IT leader with 14+ years of career, evolving from technical operations and advanced bilingual support to team leadership and infrastructure operations in highly critical corporate and industrial environments. Leading N1/N2/N3 teams, managing critical incidents, SLAs and KPIs, governance (ITIL/COBIT), vendors and infrastructure and cloud projects. I organize operations and deliver stable, secure and predictable IT, with executive interface to managers and directors. Advanced/fluent English for work with global teams.

MANAGEMENT, GOVERNANCE AND TECHNOLOGY SKILLS

Governance, Management and Processes: IT Governance, IT Operations Management, Service Delivery Management (SDM), Technical Team Leadership (N1/N2/N3), ITIL, COBIT, ITSM (Incident, Problem, Change/GMUD and Request Management), Crisis Management (War Room) and Root Cause Analysis (RCA), Performance Indicators (SLA, OLA, MTTR, FCR, CSAT), Vendor and Contract Management, Cost Optimization (CapEx/OpEx), Asset and Software License Management (ITAM/CMDB), Technical LGPD Compliance, Business Continuity and Disaster Recovery Plans (BCP/DRP), Infrastructure Project Management (Scrum, Kanban, PMBOK).

Cloud, Modern Workplace and Productivity: Microsoft 365 Administration and Governance, Microsoft Azure, Microsoft Entra ID (Azure AD), Microsoft Intune (MDM/MAM and Autopilot), Exchange Online, SharePoint Online, Teams Admin, Google Workspace, Platform and Cloud Migrations, Desktop as a Service (DaaS).

Systems, Virtualization and Monitoring: Windows Server (Active Directory, GPO, DNS, DHCP, File Server), Linux, Virtualization (Proxmox, VMware, Hyper-V), VPS and Container Environments (Docker), Windows and macOS Systems, 24/7 Proactive Monitoring, RMM Tools, Observability (Zabbix, Grafana) and ITSM Platforms (ServiceNow, Jira Service Management, GLPI).

Infrastructure, Networks and Information Security: Corporate and Industrial Network Administration (TCP/IP, Routing, Switching, VLANs, Structured Cabling), Managed Firewalls and Perimeter Security, VPNs (Site-to-Site and Client-to-Site), Endpoint Protection (EDR/Antivirus), Conditional Access and Least Privilege Policies, Local and Cloud Corporate Backup (Acronis, Veeam), Hardware and Software Management.

LANGUAGES

Portuguese: Native. **English:** Advanced / Fluent. **Spanish:** Intermediate.

PROFESSIONAL EXPERIENCE

FCA TI — São Paulo, Brazil — JUN/2022 – APR/2026

IT Infrastructure and Operations Leader

— Operational management, technical governance and sustainment of IT environments for multiple national and multinational corporate clients, ensuring high availability and strategic alignment with the business.

— Team and Operations Leadership (N1, N2 and N3): Technical management of support teams (Help Desk, Service Desk and Field Service), networks and servers, defining priorities, escalation flows and service standardization.

— Executive Interface and Strategic Alignment: Direct work with client managers and directors to report operational indicators, align priority demands and provide technical justification for technology evolution projects.

— Critical Incidents and SLAs: Leading high-severity incidents (Major Incidents), with root cause analysis (RCA) and action plans to meet strict SLAs and reduce downtime.

— Asset and Compliance Governance (LGPD): Structuring technical audits, technology asset inventory and lifecycle control of hardware and software (Microsoft 365 and corporate solutions), optimizing licensing costs and underused resources and supporting technical LGPD compliance.

— Infrastructure and Cloud Project Delivery: Planning and execution of new client onboarding, migrations and administration of Microsoft 365, Azure, Intune, Windows/Linux servers, virtualization (Proxmox, VPS, Docker) and network restructuring.

— Business Continuity and Cybersecurity: Implementation and monitoring of corporate backup strategies (local and cloud), disaster recovery plans (DRP), firewall administration, VPNs (Site-to-Site and Client-to-Site), VLANs and endpoint protection policies.

— Proactive Monitoring and Continuous Improvement: Management of 24/7 preventive routines via RMM tools, network topology documentation and creation of operational procedures to eliminate recurring incidents.

HCL Technologies — São Paulo, Brazil — NOV/2017 – JUN/2022

Senior Support and Infrastructure Analyst

— Bilingual IT infrastructure support dedicated to Rockwell Automation, working on-site in a highly critical corporate and industrial environment, serving local and international users and teams.

— Advanced N2/N3 Support: Technical focal point for diagnosing and resolving complex hardware, software, server and network connectivity incidents in both office areas and industrial operations.

— Global Articulation and Vendor Management: Continuous interface in English and Portuguese with global support and international engineering teams, as well as technical and operational alignment with local partners.

— Infrastructure Improvement and Deployment: Local delivery and technical support for technology upgrades, equipment rollouts, workstation standardization and physical and logical environment adjustments.

— Asset Management and Operational Continuity: Control of IT asset installation, configuration and replacement, ensuring compliance with global service level agreements (SLAs) and resource availability for the business.

— Standardization and Incident Prevention: Identification of recurring operational bottlenecks and implementation of corrective and preventive actions aligned with ITIL practices and global operational security standards.

Sonda IT — Santana de Parnaíba, Brazil — OCT/2015 – SEP/2016

Mid-level IT Support and Infrastructure Analyst

— Bilingual Support and IT Operations: N1 and N2 technical support (Portuguese and English) for local and international users in Cielo and Rhodia Solvay corporate environments, diagnosing hardware, software and network incidents, configuring equipment and directly supporting infrastructure routines.

Econocom Brasil — Barueri, Brazil — MAY/2013 – OCT/2015

Mid-level IT Support and Infrastructure Analyst

— Corporate Support and Deployment: N1 and N2 ticket handling in Windows environments and corporate applications, configuration of network assets and devices, and direct participation in infrastructure projects.

Grupo Help Online — São Paulo, Brazil — JAN/2012 – DEC/2012

Junior Field Technician

— Field Operations and Local Networks: On-site N1 technical support in a corporate environment, maintenance of workstations and peripherals, installation of operating systems and corporate software, and local network setup (cabling, network points and connectivity).
